

Project: SWVL Android Customer Application				
Author: Omar Radi				
Date 8/9/2020				
Environment: Production				
Device : XIAOMI MI 9				
Android Version: Android 9 PIE (9PKQ1.181121.001)				
SWVL App's version 5.16.1				

Issue #	Issue Title	Issue Description/Steps	Severity	Priority	Comments
BUG-1	As a user, I can't register to SWVL using Facebook	-Open SWVL's application -Click on Facebook -"Something went wrong please try again" validation message pops up	Critical	High	I've created a new facebook account to try it out instead of using my own personal account (mine didn't work either) but I still get the same error message when I try to do so. (I'll try it out on other devices and try to find out the root cause of it)
BUG-2	As a user, I'm able to enter my credit card as a payment method with the wrong name	-OPEN SWVL's application -Click on the burger menu on the top right -Click on "Payment" -Click on "Add Payment Method" -Add valid credit card but with a wrong name -Click on "Next" -Credit Card is confirmed as a payment method	Major	Medium	I know that's an issue probably related to a third party (one's responsible to the payment gateway) but it should be adhered since the card was accepted on SWVL's applicaiton but I got a message from the bank saying it was refused due to wrong entered data.
